com.google.inject.servlet.InternalServletModule\$BackwardsCompatibleServletContextProvider get

WARNING: You are attempting to use a deprecated API (specifically, attempting to @Inject ServletContext inside an eagerly created singleton. While we allow this for backwards compatibility, be warned that this MAY have unexpected behavior if you have more than one injector (with ServletModule) running in the same JVM. Please consult the Guice documentation at <http://code.google.com/p/google-guice/wiki/Servlets> for more information.
